

Comprehensive Gouge Auger Sets

Comprehensive Gouge Auger Sets are soil core sets for profile surveys to depths of 5m.

Quick and virtually undisturbed sampling in soils

Advantages

- Made from non toxic high tensile strength steel
- Available in 3 different lengths and 3 different diameters
- Good for soil profiling
- Easy to use, clean and very robust
- Virtually undisturbed sample
- Can be hammered into the ground
- Suitable for sludges, sediment and peat.

Disadvantages

- Not suitable for stony soils.

Alternatives

There are many different augers capable of sampling different soil types and consistencies. If you need to sample softer sediments or sludges we would recommend a Multi Sampler or Beaker Sampler, for sampling in Peat a Russian Corer may be preferred. All augers and samplers from Van Walt are unpainted and untreated so are therefore suitable for environmental research.
