

# FACT SHEET

## Double ring infiltrometer

For the determination of the rate of infiltration of water into soil.

To establish the efficiency of irrigation and drainage

### Advantages

- Ideal for infiltration measurement of top soil
- Perfect for flood / furrow irrigation advice
- Triple rings for a representative average
- Stainless steel rings will last forever
- Helps improve the yield of crops and minimises erosion.

### Specifications

- Infiltration rings Sets: 28cm, 30cm, 32cm  
53cm, 55cm, 57cm

### Accessories

- Driving plate for hammering in infiltration rings
- Measuring bridge for ring infiltro meter
- Float with measuring rod
- Pull out hook
- Stopwatch, digital, measuring range 10 hours
- Steel hammer with nylon heads, 2kg impact absorbing design.
