

Flow-through cell

Flow-through cell to help and improve the accuracy of in-line measurement of pH, redox, EC, T, and O₂.

Improves the ease and precision of in-line field measurements

Advantages

- Makes taking pH/EC/O₂/Redox measurements more simple
- Works with practically all electrodes
- Principle enables 0% O₂ measurements
- Easy to clean and sand is not a problem
- Simple and durable; can withstand field conditions
- Protects electrodes during use, less handling, no wet hands
- Specifically designed for minimal air contact.

Specifications

- Maximum 6 electrodes
- Clamp with ground pin for tubes and bottles available.
