

FACT SHEET

Fultz SP400 Pump

An electric, submersible, positive displacement gear pump for wells larger or equal to 2”.

A low voltage submersible displacement pump

Advantages

- Low DC voltage
- Reliable
- For sampling wells to 90 metres with a head of water less than 50 metres
- Low maintenance
- Relatively cheap repairs.

Disadvantages

- Susceptible to suspended sediments
- Can not run dry.

Accessories

- AC/DC Controller
- PE discharge tube.

Specifications

- 44mm diameter
- 23cm length
- Materials: 304 Stainless Steel & Teflon
- Voltage: 36V by means of AC 110V controller
- Lift: 55 meters
- Cable length: 90 meters
- Flow rate: 8 l/min at 1metre, 3 l/m at 55 metres, approximately.
