

FACT SHEET

ORS Filter Bucket

An independent skimmer equipped with a visual alarm to indicate when full.

A passive hydrocarbon recovery skimmer

Advantages

- Recovers and stores product in an integral 2-litre reservoir
- Separates product from water via filtration through a mesh screen, specially treated to pass oil and repel water
- A very stable and gas-proof system
- Designed to cease taking on product when the reservoir is full
- The only maintenance required is periodic cleaning of the cartridge screen.

Specifications

- Height 16"
- Diameter 10"
- Weight 7 lbs.
- Capacity 2 liters
- Body made from Polyethylene
- Hoses constructed of Polyethylene
- Check Valves Nylon
- Cartridge 100 Mesh Oleophilic/hydrophobic (blue)
- 60 Mesh Oleophilic/hydrophobic (green).

Alternatives

For recovery of both product and water a Total Fluids Pump "Reclaimer" or "Auto Reclaimer" would be suitable. For larger product only recovery an active skimmer system can be used.
