

# FACT SHEET

## Pico HD2 Meter

A mobile soil moisture readout device for accurate, clear onsite readings especially recommended for Pico 32 or 64 probes and tube profiling probe Pico IPH.

**Robust, easy to use, soil moisture measurement handheld readout device**

### Advantages

- Easy to use
- Convenient one-handed operation
- Strong, durable and waterproof construction specifically designed for onsite conditions
- All relevant information displayed on one screen.

### Specifications

Power supply:	4.8V-DC, 2000mAh battery capacity. Full battery for up to 5,000 measuring cycles sufficient
Resolution:	0.01%
Calibration:	On sensor
Case:	Weatherproof, robust aluminium diecast (IP67)
Dimensions:	150 x 64 x 36mm (Length x width x height)
Weight:	437g.

### Alternatives

For manual soil profiling with a Pico IPH Sensor a Pico BT Bluetooth Meter is an option and for automatic soil profiling a GlobeLog datalogger, with or without an option for telemetry.
