Pump Comparison Table

How to find the right pump

Confused about pumps? Why wouldn't you be – there are so many to choose from and each one has a different use and application.

To make it easier to find a suitable pump Van Walt has produced a Pump Comparison Table, downloadable from <http://www.vanwalt.com/rental-pumps.htm>. This free tool highlights the different types of pump, the minimum well diameter, maximum head lift and flow rate, suitability for sampling and purging plus the advantages and disadvantages of each – the ultimate guide to finding the right pump for your sampling or monitoring project.

By taking a quick look at the Comparison Table you could save valuable time. By marrying your project requirements to the individual pumps' criteria, performance and benefits you will be able to quickly find your ideal sampling, monitoring or purging pump. And, if you are still confused you can always talk to one of our experts – we have more than 25 years experience in the environmental field and would be pleased to help. Pumps are available to rent or buy.

Call Van Walt on 01428 661 660 or visit www.vanwalt.com .

Van Walt Ltd is a specialist supplier of soil and groundwater monitoring equipment to the environmental, educational and agricultural research communities.
