YSI Trade-in Offer

Van Walt launch scrappage scheme on old, damaged or obsolete meters against a brand new one

In these tough times bagging a bargain applies to equipment procurement equally as importantly as all other business services and overheads. That's why Van Walt, the specialist supplier of environmental soil and groundwater monitoring equipment, is delighted to offer an exclusive scrappage discount against old or broken water quality meters for a brand new YSI Pro Plus or YSI Pro ODO.

For a limited period trade in an old meter – whatever the condition or type - against a brand new leading water quality meter used by consultants, government agencies and environmental researchers due to their reliability, robustness and proven track record in the field.

“YSI are the meter of choice in our profession,” claims Vincent van Walt, Director. “Each model is the result of more than 50 years research and development; is rigorously tested and backed by comprehensive warranties.”

For full details of this offer and the YSI Pro Plus and Pro ODO visit www.vanwalt.com or call 01428 661 660.
