

Single & Extendable Gouges

Single and Extendable Gouges for soil mapping, suitability reviews, root, fertilisation, clay and paleontological research with minimal disturbance.

Quick and virtually undisturbed sampling in soils

Advantages

- Will take samples in the toughest of soils
- Fast and easy to use
- Will cut through bricks and withstand stones
- Virtually undisturbed profile for analysis
- Made from non-toxic high tensile strength steel
- Easy to clean and very strong
- Supplied in various lengths and diameters
- Available in sets or individually depending on budget/need.

Disadvantages

- Not suitable for sludges and sediment.

Accessories

- Spatula
- Sturdy carrying case
- Impact hammer.

Specifications

- 50cm or 1m sample
- 30mm diameter.

Alternatives

There are many different augers capable of sampling different soil types and consistences. If you need to sample softer sediments or sludges we would recommend a Multi Sampler or Beaker Sampler, for sampling in Peat a Russian Corer Peat sampler may be preferred. All augers and samplers from Van Walt are unpainted and untreated so are therefore suitable for environmental research.
