

## Multi Pump Controller

The **Multi Pump Controller is** a low maintenance, multiple pump controller for well development, remediation and long term dewatering.

### Controlling multiple pumps and reclaimers

#### Advantages

- Controls up to 4 pumps/reclaimers
- Pumps to depths of 60m with sufficient pressure and pump
- Works in 2" or 4" wells
- Low maintenance with no moving parts down well
- Ideal for well development
- Can be used to control low flow sampling bladder pumps or high volume purging reclaimers
- Can be used with a 12V battery powered by a solar panel
- Designed for continuous onsite pumping
- Ideal for remote locations.

#### Disadvantages

- Controller requires external compressor.

#### Accessories

- 81150013/14 42mm/22mm portable bladder pump
- 81150100 42mm dedicated bladder pump
- Our range of reclaimer total fluid pumps
- PE tubing.

#### Specifications

- 12V Powered
- Fill/Discharge periods of 1 second to 1 hour
- Pumping time 1 to 15 seconds
- Up to 100psi capabilities
- Can operate sampling pumps and purging pumps down to 60m.

#### Alternatives

For single pump applications a Geocontrol 2 or PRS.
