

Window Sampling Sets

Window Sampling sets are for professionals who regularly drill, sample or who are involved in mineral exploration in hard soils which may contain rubble and/or stones or who are working in difficult to access sites.

Window and windowless sampling in all soil conditions for undisturbed samples

Advantages

- Custom sets available to cater for your needs
- On site training provided with every set,
- Ideal for restricted access
- Robust and strong RD32 connection
- Requires little maintenance
- Perfect for taking metre long undisturbed samples
- Suitable for contaminated sampling
- Non-destructive sampling technique.

Disadvantages

- Expensive compared to manual auger sets
- Less portable than manual drilling equipment.

Accessories

- Cobra TT Percussion Drill
- Liner and foil sample sets.

Alternatives

Manual auger sets are available for less frequent/repetitive drilling in less hostile soils.
