

Liners & Caps

Liners & Seals to collect soil samples

- Plastic, stainless steel, brass, or aluminum
- Liners available by diameter, length, and material type
- Soil sample is augered into the liner
- Protective Caps seal the sample and help reduce the loss of sample
- Liners are 6 mm smaller in diameter than the cylinder.
- Liners enable field extraction, extrusion and preservation of a soil sample.

Specifications:

- Various sizes available depending on auger or probe type
- From stock we supply transparent PVC liners
- Compatible with Soil Recovery Augers, Flighted Screw Augers, Soil Core Samplers, Soil Recovery Probes, Multi-Stage Core Samplers and Soil Sampling Kits.
