

Well Cover

This new well cover has been developed by VRM and was designed with safety and user friendliness in mind. The lid is secured with a stainless steel 'anti-theft' socket screw and provides robust protection. With an increasing demand for telemetry this well cap does not block or scatter telemetric signals and provides sufficient interior space for an antenna. Ideal for finishing of any monitoring wells.

- Body size 300mm x 300mm
- Dimensions of lid $\varnothing 200$ mm
- Does not block or scatter telemetric signals
- Spacious interior cavity
- Light weight
- Inexpensive
- Robust protection
- Very strong
- Maximum pressure 3 tonne
- User friendly
- Lid is sealed with O-Ring to prevent moisture and dirt ingress
- Anti-theft stainless steel socket screw.
